

## **Title: "City of Innovateburg - Green Infrastructure Policy 2024"**

**Section 1: Preamble** The City of Innovateburg is committed to fostering a sustainable and resilient urban environment. This policy outlines our strategy for integrating green infrastructure into urban planning, development, and maintenance. Our goal is to enhance biodiversity, manage stormwater effectively, and improve public well-being through nature-based solutions.

### **Section 2: Key Objectives**

- **Stormwater Management:** To reduce urban runoff and mitigate flooding risks by implementing permeable pavements, green roofs, and rain gardens.
- **Air Quality Improvement:** To use strategic tree planting and urban green spaces to filter pollutants and lower ambient temperatures.
- **Biodiversity Enhancement:** To create and protect habitats for local flora and fauna within city limits, promoting a healthy ecosystem.
- **Community Engagement:** To involve citizens and local businesses in the planning and execution of green infrastructure projects.

### **Section 3: Implementation Guidelines**

- All new commercial and residential developments of over 5,000 square meters must dedicate at least 15% of their land to green infrastructure.
- The city will provide grants and tax incentives for businesses and homeowners who voluntarily install green roofs or rain gardens.
- An annual public forum will be held to gather feedback and report on the progress of our green initiatives.

**Section 4: Budget Allocation** A budget of \$5 million has been allocated for the 2024-2025 fiscal year to support these initiatives, including a dedicated fund for community projects.
